Larry,

In business it is rare that people take the time to say thanks. We always say that no news is good news. I like to break that trend when possible, so I wanted to reach out once again and say thank you for all of the effort on this deal. Boyd and I truly feel that we have a great asset that will bring tremendous value to our operations for years to come. Your professionalism and persistence is much appreciated.

Thanks again to you, John, and the Bartelt team for a job well done, and your hospitality today during our visit. I look forward to the quote on the engine heater solution, and I will keep you informed as to our next visit at the 25 hour mark.

Best regards, and happy Holidays,

Joe Emfield & Boyd Bullock.
