Subject: Reference

My first experience with Bartelt aviation was shortly after purchasing my Turbo Saratoga. I called and arranged an instructor to come down and take me through their Saratoga school. The arrangements were made and the instructor showed up on time and ready to go. I spent three days with Pete and he put me through a structured training regimen. The training was fun and informative. I felt confident in the Saratoga and a better pilot after this training.

Several years later I decided to sell my plane due to losing my medical. I contacted John Bartelt and put the plane on the market. I could not have made a better choice. Bartelt led me through the process with ease and got a good price for my plane. If I would sum up Bartelt aviation it would be "Better than advertised, friendly, and professional."

If I should ever purchase another airplane I will only buy through Bartelt Aviation.

Thanks John for all you did for me.
